

# Inventor Quiets Garbage Cans

PARIS—A device to enable garbage men to move cans quietly was shown when 800 amateur inventors paraded their devices.

A taxi driver, worried over the danger of being hit over the head by a fare, designed a car in which the driver sits behind and above his passengers.

The amateur inventors' show offers nearly \$3,000 in prizes each year.

# Chinese Teams Eye Oil Prospects

HONG KONG.—About forty geological survey teams are preparing to leave Sian for the Tsaidam basin in Chinghai province to explore the oil possibilities in that part of north west China.

The Hsinhua news agency said the teams would survey oil bearing structures discovered last year.
