

Elaborate Alarm Appeals to Thief

ST. LOUIS.—Edward G'Sell, a building repair contractor, worked pretty hard installing a burglar alarm system on a garage where he keeps most of his material. It had an electric eye and a very loud warning bell.

However, he reported to police that burglars came around the other night. The only thing they took was the burglar alarm, electric eye and all.

Burglar Takes Safe--From Jail

MELBOURNE (Australia).—A burglar broke into Castlemaine jail, seventy-five miles from here, and made off with the governor's safe—containing \$302.

Investigators said he broke into an office, stole the keys, opened the main gate, drove his car in, stole the safe, and then drove away. He left the main gate carefully locked again.
